                          combination, expression vector, nucleotide sequence of the B thuringiansis cryl gene with high-toxicity to lepidoptera pests and the amino acid sequence of the protein encoded by it, cooperative use of the cryl gene with the expression product of crylAb or crylBa, primer sequences for expressing the genes, and the constructed shuttle vector pSXY42D. The gene in combination with the crylAb or crylBa genes displays high toxicity to the lepidoptera, coleoptera and diptera pests. The present sequence represents the cryllel protein.
                                                                                                                                                                                                                                                              9

                                                                                                                                                                                                                                                                                                                                                                                                                                          9
                                                                                                                                                                                                                                                                                                                                                                                                                                                               9
                                                                                                                                                                                                                                                                                                          The present invention relates to novel insecticidal proteins obtained from Paecilomyces sp. (see AAB66899 to AAB66901 and AAB66913). The insecticidal proteins can be used to produce transgenic plants, which insect-resistant. Also, the insecticidal proteins are useful for controlling insects by providing them at a locus where insects feed

```
The invention relates to insecticidal protein comprising an X-glycine motif at the amino-terminus. Polynucleotide or DNA constructs of the invention are useful for producing plants or plant parts that are resistant to insects. The protein or synergistic combination is useful as an active ingredient of a pesticide or for controlling insects. Antibodies raised to the insecticidal proteins can be used to identify other proteins with insecticidal activity. The present sequence is Bacillus thuringiensis insecticidal crystal endotoxin (CRY) protein. This sequence is used in the invention

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        셤
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ò
paragoral crystal protein - Bacillus thuringiensis (strain aizawai)
C;Species: Bacillus thuringiensis
C;Species: Bacillus thuringiensis
C;Species: Datilus thuringiensis
C;Accession: A26513
R;Oeda, K.; Oshie, K.; Shimizu, M.; Nakamura, K.; Yamamoto, H.; Nakayama, I.; Ohkawa, H.
R;Oeda, K.; Oshie, K.; Shimizu, M.; Nakamura, K.; Yamamoto, H.; Nakayama, I.; Ohkawa, H.
A;Title: Nuclectide sequence of the insecticidal protein gene of Bacillus thuringiensis
A;Accession: A26513
C;Gyberians: 1-1155
C;Superfamily: parasporal crystal protein
C;Superfamily: parasporal crystal protein
C;Keywords: delta-endotoxin

parasporal crystal protein - Bacillus thuringiensis
C;Species: Bacillus thuringiensis
C;Species: Bacillus thuringiensis
C;Species: Bacillus thuringiensis
C;Accession: A22798
R;Shibano, Y; Yamagata, A; Nakamura, N; Ilzuka, T; Sugisaki, H; Takanami, M.
C;Accession: A243-251, 1985
A;Title: Nucleotide sequence coding for the insecticidal fragment of the Bacillus thuring A;Reference number: A22798; MUID:85232070; PMID:2989108
A;Accession: A2279
A;Accession: A2279
A;Molecule type: DNA
A;Residues: 1-934 c&HI:
A;Cross-references: UNIPROT:Q985V8; GB:M10917; NID:g143100; PIDN:AAA22552.1; PID:g551713
C;Comment: The authors translated the codon ACA for residue 264 as Ser.
C;Keywords: delta-endotoxin

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 4,

Sequence 10, Application US/08448170
September 10, Application US/08448170
SENERAL INFORMATION:
APPLICANT: Payne, Jewel
APPLICANT: Cannon, Raymond J.C.
APPLICANT: Narva, Kenneth B.
APPLICANT: Stelman, Steve
TITLE OF INVENTION: No. 5723758el Bacillus thuringiensis Isolate Denoted
TITLE OF INVENTION: B.t. F8158C2, Active Against Lepidopteran Pests, and Genes
TITLE OF INVENTION: Encoding Lepidopteran-Active Toxins
NUMBER OF SEQUENCES: 10
CORRESPONDENCE ADDRESS:
